What to expect:

Starting therapy for the first time is something to be proud of, but it can also feel daunting. Here are a few reminders about the process:

- If you are in a crisis or any other person may be in danger - don't use this site.
Please visit betterhelp.com/gethelpnow for resources that provide immediate help.
- It's ok to start therapy even if you feel like you don't have lots to talk about.
- Your therapist cares about who you are and how you're doing. The relationship between you is where a lot of the most important work happens.
- Switching therapists is totally ok. You can switch anytime and as many times as you need to find the right fit.
